Re: Patent Application for "DOWNCOMER FOR CHEMICAL PROCESS TOWER"  
Our File No. 27771-00210

Dear Larry:

Enclosed is a copy of the originally filed application, a Preliminary Amendment, and a Declaration and Power of Attorney.

The Preliminary Amendment cancels original claims 1 - 4 and 9 - 12, which were determined to be directed to the trays for a tower that was sold to a Korean company. It was determined that original claims 5 - 8 and 9 - 12 and new claims 17 - 34 did not read on the trays for the Korean job. Original claims 5 - 8 are directed to an apparatus using a downcomer with a discharge plate, and original claims 13 - 16 are directed to a method of using a downcomer having a discharge plate.

New claims 17 - 22 are directed to a downcomer below a multi-chordal outlet weir, the downcomer being choked near the center region. New claims 23 - 29 are directed to a downcomer below an arcuate shaped outlet weir (such as semi-circular), the downcomer being choked near the center region. New claims 30 - 34 are directed to a downcomer with a discharge plate, the apertures in the discharge plate being such that more liquid is discharged at the edged regions of the downcomer than the center region.

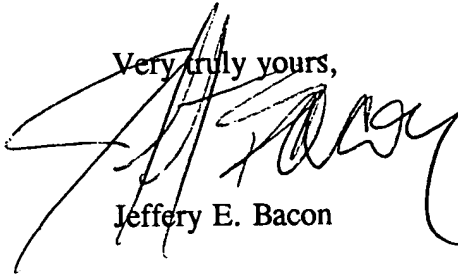

Due to a change in the law, we will need to file a declaration for this application by **December 1, 1997**. Therefore, if this amendment concurs with your understanding of the invention and how the application should be amended to avoid the Korean tower, please sign and return the

enclosed declaration at your earliest convenience. If there are additional modifications required to the application, please call Stan Moore or me to make those changes.

I look forward to hearing from you regarding this matter. If you have any questions or comments, please let us know.

Very truly yours,

A handwritten signature in black ink, appearing to read "Jeffery E. Bacon", written over the typed name.
